DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 1-15, 25-27, 33, 34 drawn to prosthetic device and with cord, classified in class 623, subclass 1.13.
- II. Claims 16-24, 28-31, drawn to prosthetic device with attachment tab classified in class 623, subclass 1.36.
- III. Claim 32, drawn toward prosthetic device with cord, attachment tab, and tab extension ring.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because each of the subcombinations, Group I and II, have different means of attachment/fixation to the body lumen. The subcombinations have separate utilities such as serving to maintain a fixed position in a body lumen and provide structural support to the area around the lumen.

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different

Art Unit: 3738

inventions are structurally different. Group I has attachment means that is incorporated into the structure of the device. Group II require the attachment tab be wired to the body of the device. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

This application contains claims directed to the following patentably distinct species of the claimed invention:

Upon election of **Group I**, please elect **one** of the following embodiments: **A, B, C**.

Species 1: Device with cord

Embodiment **A**: Figs 1-3,6

Embodiment **B**: Fig. 4

Embodiment **C**: Fig. 9

Upon election of **Group II** please elect **one** of the following embodiments: **D, E**.

Species 2: Device with tab

Embodiment **D**: Figs. 5a, 5b

Embodiment **E**: Fig. 5c

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none of the claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to Christopher Lewis on January 7, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

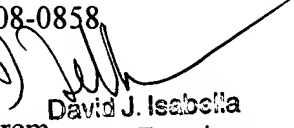

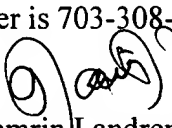

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kamrin R. Landrem whose telephone number is 703-305-8061. The examiner can normally be reached on 8:00-5:00, Monday-Friday.
